MELBOURNE STAR OBSERVATION WHEEL

Towering 120m high over the Docklands, the Melbourne Star is the only giant observation wheel in the Southern Hemisphere, and one of only four in the world, joining London Eye, Singapore Flyer and Las Vegas High Roller.

You're invited to take flight and discover a truly unique experience. Get a fresh perspective on Melbourne as you step into a temperature-controlled cabin with floor to ceiling windows and take in the breathtaking 360 degree views as you float above the streets of the Victorian capital. From famous landmarks, glittering skyscrapers and funky laneways to the bustling Docklands and the ocean beyond, your unique vantage point will treat you to sights as far as the Dandenong and Macedon Ranges and across Port Phillip Bay. Whether you're a visitor looking to discover our great city, or Melburnian born and bred, a trip on the Melbourne Star will show you a side of the city you'll see nowhere else. As you glide serenely through the Melbourne sky, audio commentary will give you insights into the city's sights, history and culture.

With its stunning light shows and striking scale, the Melbourne Star is a glittering jewel in the sky above Melbourne's Docklands. The unique "Star within a Star" design represents the seven-pointed Federation Star of the Australian flag which is transformed at night by a kaleidoscope of colours in a spectacular LED display with over five million different combinations.

Enhance your experience with a glass of sparkling, a delightful high tea on board and make your trip across Melbourne's sky an experience to truly savour.

After your flight you can also enjoy a sit down meal at one of the nearby restaurants at The District Docklands.

Melbourne Star is the perfect starting or finishing point for any day out in our great city.

We look forward to welcoming you – come fly with us!
